

List of practicals:

1. Write a C++ program to find the sum of the individual digits of a positive integer.
2. Write a C++ program to generate the first n terms of the sequence.
3. Write a C++ program to generate all the prime numbers between 1 and n, where n is a value supplied by the user.
4. Write a C++ program to find both the largest and smallest numbers in a list of integers
5. Write a C++ program to sort a list of numbers in ascending order.
6. Write a Program to illustrate the New and Delete Keywords for dynamic memory allocation.
7. Write a program Illustrating Class Declarations, definitions, and Accessing Class Members.
8. Program to illustrate default constructor, parameterised constructor and copy constructors.
9. Write a Program to implement a Class STUDENT having the following members:
Data members: StudentName, Marks, Total, MaxMarks,
Member Function: assign() (Assign Initial values), compute() (To compute total and Avg), display() (to display data).
10. Write a Program to Demonstrate the i)Operator Overloading.ii) Function Overloading
11. Write a Program to Demonstrate Friend Function and Friend Class.
12. Write a Program to Access Members of a STUDENT Class Using Pointer to Object Members
13. Write a Program to generate the Fibonacci Series, use a constructor to initialise the Data Members.
14. Write a C++ program to implement the matrix ADT using a class. The operations supported by this ADT are:
 - a. Reading a matrix.
 - b. Addition of matrices.
 - c. Printing a matrix.
 - d. Subtraction of matrices.
 - e. Multiplication of matrices
15. Write C++ programs that illustrate how the following forms of inheritance are supported: a)Single inheritance b)Multiple inheritance c) Multi-level inheritance d)Hierarchical inheritance
16. Write a C++ program that illustrates the order of execution of constructors and destructors when new class is derived from more than one base class.
17. Write a Program to Invoking Derived Class Member Through Base Class Pointer.
18. Write a template-based program to Sort the Given List of Elements.
19. Write a C++ program that uses function templates to find the largest and smallest number in a list of integers and to sort a list of numbers in ascending order.
20. Write a Program Containing a Possible Exception. Use a Try Block to Throw it and a Catch Block to Handle it Properly.
